

Adventure®

Model: A-280

Arta – the harmony of lightness, style and superior quality

The Arta series of inflatable boats represents a new generation of Adventure boats. The inflatable tube is designed in the "Italian style", whilst the inflatable floor and inflatable keel will meet all the demands of the most exacting owner. All of the usual advanced Adventure technical features have been retained, using the finest materials and accessories. New ideas have been utilized, too, resulting in the superlative Arta series of boats. It goes without saying that the lighter weight has been achieved despite the maintenance of our legendary high quality. Extreme manoeuvrability, lightness, easy handling, and the usual very high specification of standard accessories make the Arta series a joy to own.

Material used: Valmex 1000 g/m², manufactured in Germany

Floor type: Inflatable air-deck

Floor material: Heytex 1100 g/m², manufactured in Germany

Standard equipment:

- Modern unique high-technology Italian style welded inflatable buoyancy tube of classic design with 3 hermetically-separated chambers
- Inflatable keel providing correct 'V' shape in hull
- Inflatable air-deck
- Extremely rugged integral transom for outboard motor with fitted plastic plate for mounting motor
- Full outboard protection guards against scuffing and keeps inside of boat dry
- Drain plug in transom
- Safety grab-ropes on tubes
- Handle in nose also serves as towing ring
- Twin towing rings
- Twin rear moulded handles for lifting boat
- Removable marine-ply seats, 20 mm thick, with positive, safe location; (A-220 and A-240 have single seat – other Arta models have two seats)
- Two oars with rowlocks, and twin tube-mounted oar supports
- Lifting ring in nose of boat
- Superb carrying and storage bag
- Foot-pump with valve adaptor
- Emergency repair kit in plastic container, including material and adhesive
- Operation manual

A really excellent tender for yachts and motorboats

Light weight makes for easy transportation

Air-deck is incredibly strong and very convenient

Extreme ease of preparation and assembly

Inflatable floor with valve

Inflatable keel for the great seaworthiness
